## INTRODUCTION

Nearly one million Missouri residents experienced a mental illness in the past year, and three-quarters of a million experienced a substance use disorder. The annual *Status Report on Missouri's Substance Use and Mental Health* has been tracking these and other behavioral health data since the mid-1990s, with assistance from state and federal agencies and other sources. Section A acknowledges the individuals who contributed data for this 28<sup>th</sup> edition. An overview highlights some of the report's main findings.

Section B of the report quantifies the prevalence of mental illness and substance use disorders in Missouri and nationwide using numerical and percentage estimates from the National Survey on Drug Use and Health. Trend charts illustrate the increasing numbers of Missourians impacted. Section C presents incidence data from the Missouri Student Survey and the Missouri Assessment of College Health Behaviors. More of our children and young adults are facing mental health challenges than in past years.

Section D captures mental-health related medical, behavioral, socio-economic and law enforcement data from Missouri state agencies and illustrates multi-year trends. Section E unpacks this data into county and regional profiles to support data-driven planning and decision-making.

The Department of Mental Health, Division of Behavioral Health manages programs that provide treatment services to more than 100,000 Missouri residents annually. Section F of the report contains county profiles summarizing the substance use disorder services provided and the populations they serve. Section G provides profiles for the mental health services.

Section H provides annual population estimates, and Section J includes maps illustrating the geographic coverages of the various data profiles in the *Status Report*.

The Missouri Behavioral Health Data archive houses much of the data from past editions of the *Status Report*, as well as data from the biennial Missouri Student Survey. Visit <https://seow.dmh.mo.gov/>.

## MISSOURI DATA HIGHLIGHTS

The latest Missouri estimates from the National Survey on Drug Use and Health<sup>1</sup> indicate 778,000 Missouri adolescents and adults experienced substance use disorders during the past year. They include 526,000 with disorders involving alcohol use, 343,000 with illicit drug use and 49,000 with prescription drug misuse. The estimates use updated criteria implemented in 2020 for defining substance related disorders.<sup>2</sup>

Missouri data from the NSDUH also indicate 996,000 adult residents experienced mental health issues during the past year. They include 292,000 with serious mental illness, 483,000 who experienced major depressive episodes and 256,000 who had serious thoughts of suicide. Additionally, 79,000 adolescents had major depressive episodes.

<sup>1</sup> The National Survey on Drug Use and Health (NSDUH) conducts 70,000 household interviews annually of people age 12 and older in all 50 states. Survey topics include alcohol, tobacco, drug, and mental health issues.

<sup>2</sup> In 2020, NSDUH implemented new criteria, based on the Diagnostic and Statistical Manual of Mental Disorders Fifth Edition (DSM-5), for identifying substance use disorders and determining the need for specialized treatment. This update yields generally higher prevalence rate estimates for 2020 compared to prior years' rates based on DSM-IV. All NSDUH population estimates round to the nearest thousand.

<sup>3</sup> The Missouri Department of Mental Health and Missouri Department of Elementary and Secondary Education conduct the Missouri Student Survey on even-numbered years. Participating school districts assist in administering the survey online to middle and high school students in grades 6-12. The Missouri Institute of Mental Health coordinates the project and provides data analysis.

<sup>4</sup> Partners in Prevention is a consortium of 24 Missouri colleges and universities participating in the Missouri Assessment of College Health Behaviors, an annual survey with 6,700 student respondents in 2022. Partners in Prevention is based at the University of Missouri—Columbia.

- 1 Use of the substance on all 30 days during the 30 days prior to the survey.
- 2 Use of the substance on at least 1 day during the 30 days prior to the survey
- 3 Binge alcohol use in the YRBS is defined as males consuming 5 or more drinks in a row and females consuming 4 or more drinks in a row within a couple of hours on at least one day during the past 30 days.
- 4 Use of cigarettes on 20 or more days during the 30 days prior to the survey.
- 5 Percentages are among the current smokers.
- 6 Does not include electronic vapor products.
- 7 Use of smokeless tobacco products on 20 or more days during the 30 days prior to the survey.
- 8 Used electronic vapor product on 20 or more days during the 30 days prior to the survey.
- 9 Use of the substance at least once in lifetime.
- 10 Prescription pain medicine without a doctor's prescription or differently than how doctor instructed to use it.
- 11 Student was offered, sold, or given an illegal drug on school property.

Values shown are weighted estimates based on sampling. Apparent differences in values may not be statistically significant due to relatively small numbers of Missouri survey respondents.

- 1 Use of the substance on all 30 days during the 30 days prior to the survey.
- 2 Use of the substance on at least 1 day during the 30 days prior to the survey
- 3 Binge alcohol use in the YRBS is defined as males consuming 5 or more drinks in a row and females consuming 4 or more drinks in a row within a couple of hours on at least one day during the past 30 days.
- 4 Use of cigarettes on 20 or more days during the 30 days prior to the survey.
- 5 Percentages are among the current smokers.
- 6 Does not include electronic vapor products.
- 7 Use of smokeless tobacco products on 20 or more days during the 30 days prior to the survey.
- 8 Used electronic vapor product on 20 or more days during the 30 days prior to the survey.
- 9 Use of the substance at least once in lifetime.
- 10 Prescription pain medicine without a doctor's prescription or differently than how doctor instructed to use it.
- 11 Student was offered, sold, or given an illegal drug on school property.

Values shown are weighted estimates based on sampling. Apparent differences in values may not be statistically significant due to relatively small numbers of Missouri survey respondents.

## BEHAVIORAL RISK FACTOR SURVEY: ALCOHOL USE

### Alcohol Use in the Past 30 Days among Adults 18 Years of Age and Older (%)

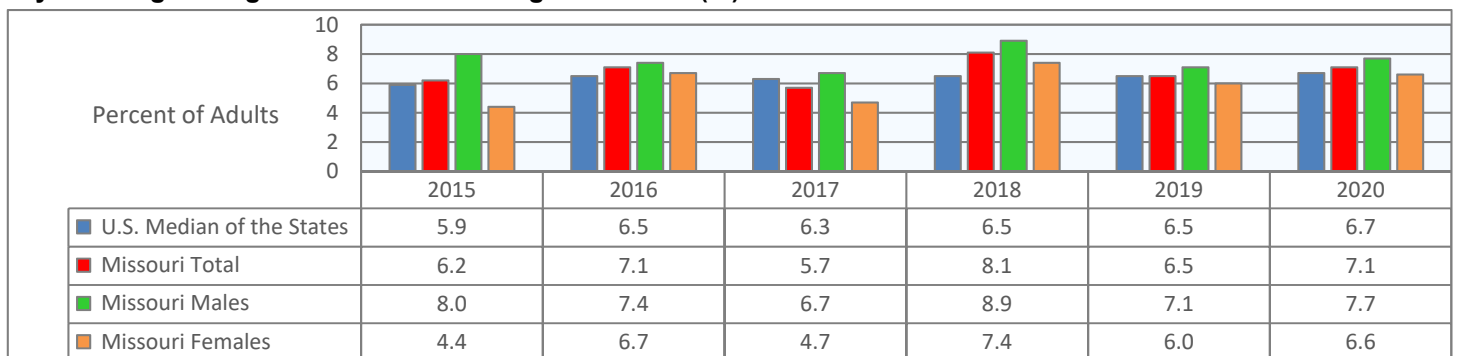

### Binge Drinking among Adults 18 Years of Age and Older (%)

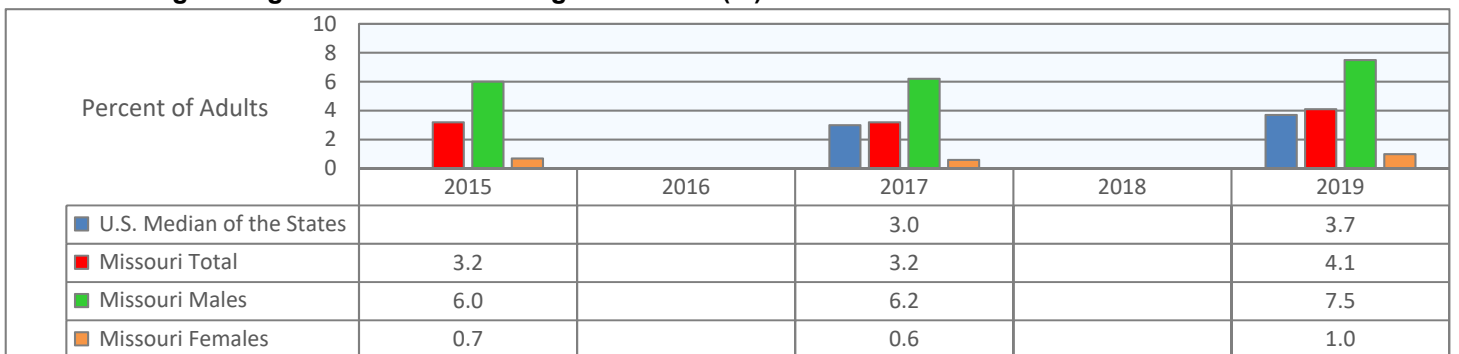

Binge drinking is defined in the BRFSS as males having 5 or more drinks on one occasion and females having 4 or more drinks on one occasion.

### Heavy Drinking among Adults 18 Years of Age and Older (%)

Heavy drinking in the BRFSS is defined as adult males having more than 14 drinks per week and adult females having more than 7 drinks per week.

### Chronic Drinking among Adults 18 Years of Age and Older (%)

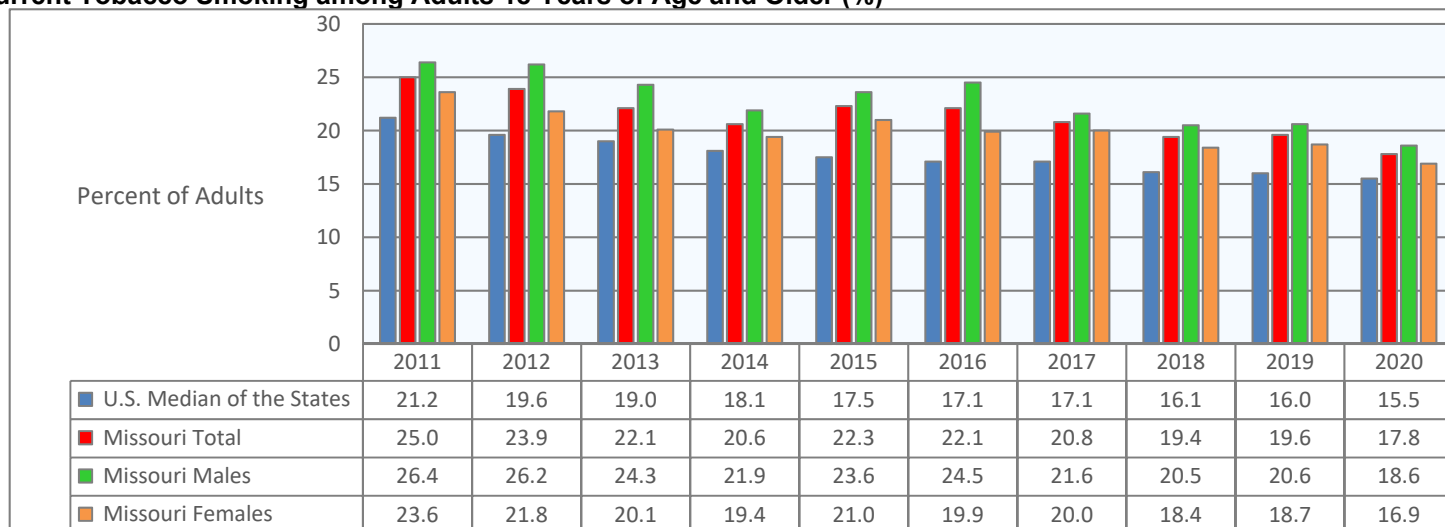

Chronic drinking in the BRFSS is defined as having more than 60 drinks in the past month.

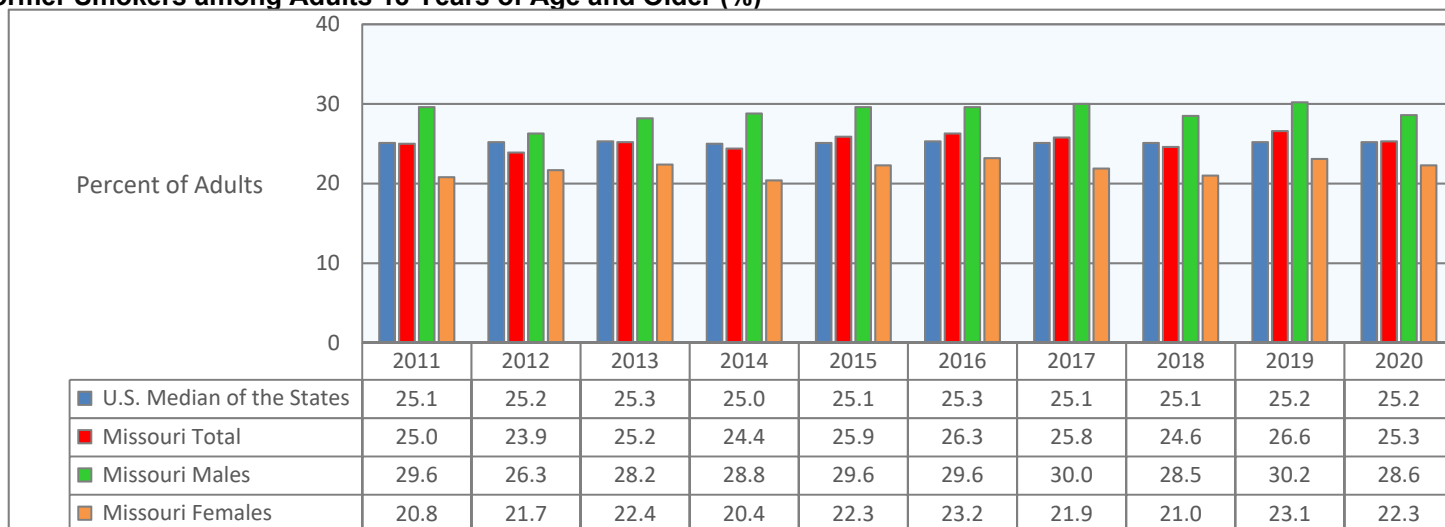

Data Source: Behavioral Risk Factor Survey, Behavioral Risk Factor Surveillance System (BRFSS), Centers for Disease Control and Prevention, National Center for Chronic Disease Prevention and Health Promotion, Division of Population Health.  
Small differences in rate estimates for Missouri year-to-year and Missouri/U.S. comparisons might not be statistically significant.

## BEHAVIORAL RISK FACTOR SURVEY: PREVALENCE OF TOBACCO SMOKING

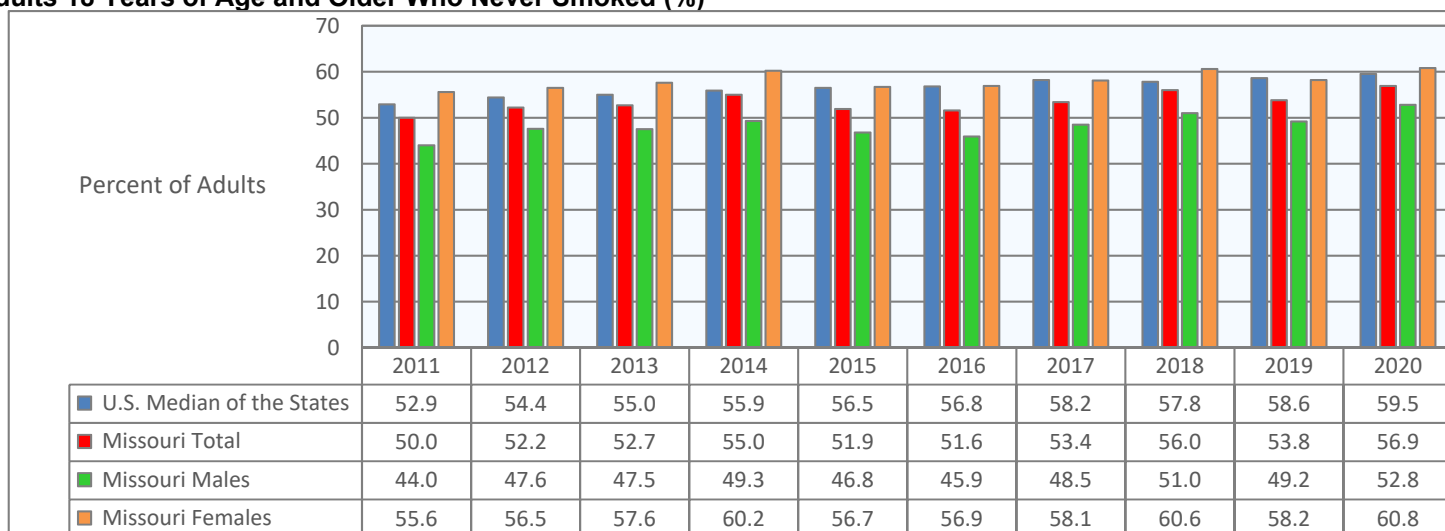

### Current Tobacco Smoking among Adults 18 Years of Age and Older (%)

### Former Smokers among Adults 18 Years of Age and Older (%)

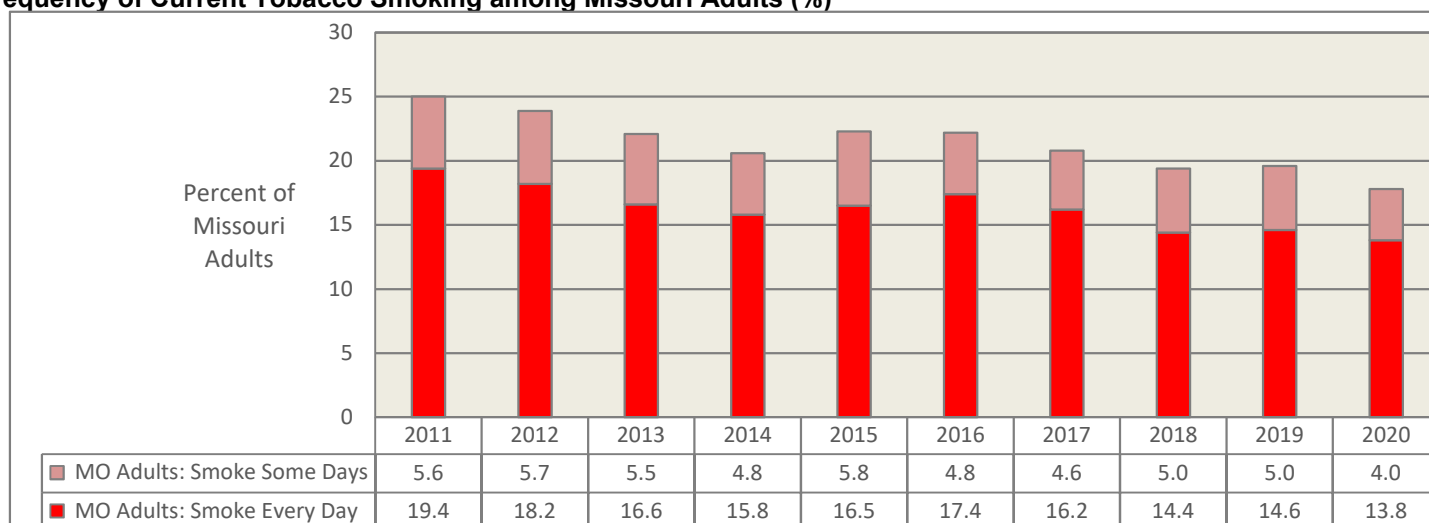

### Adults 18 Years of Age and Older Who Never Smoked (%)

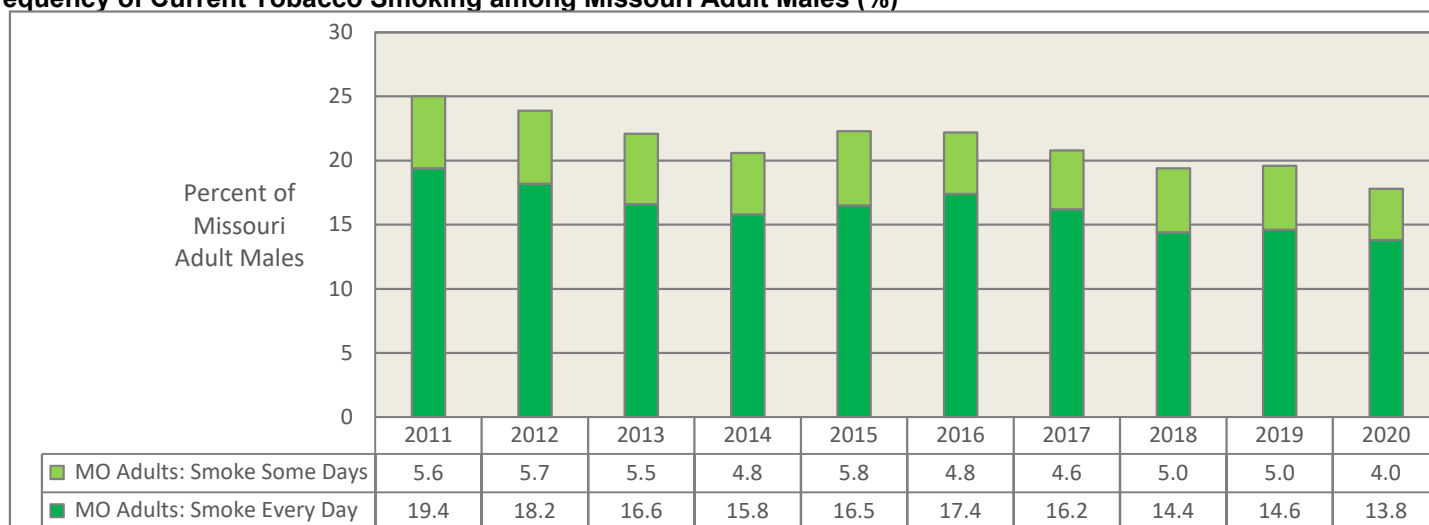

Data Source: Behavioral Risk Factor Survey, Behavioral Risk Factor Surveillance System (BRFSS), Centers for Disease Control and Prevention, National Center for Chronic Disease Prevention and Health Promotion, Division of Population Health.  
Small differences in rate estimates for Missouri year-to-year and Missouri/U.S. comparisons might not be statistically significant.

## BEHAVIORAL RISK FACTOR SURVEY: FREQUENCY OF TOBACCO SMOKING

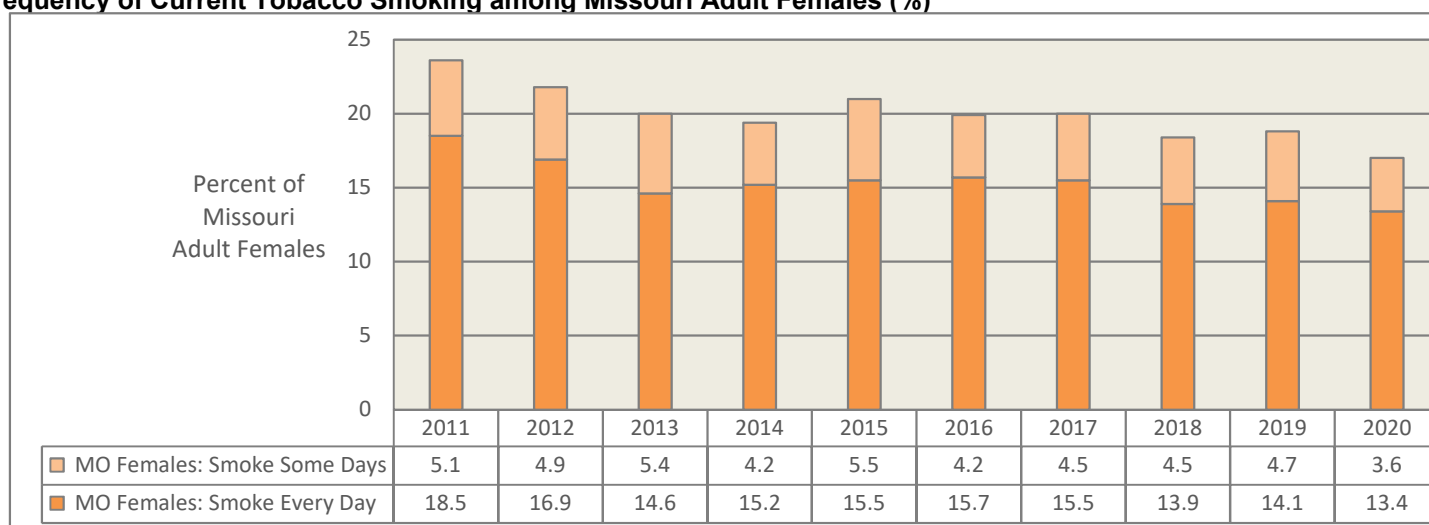

### Frequency of Current Tobacco Smoking among Missouri Adults (%)

### Frequency of Current Tobacco Smoking among Missouri Adult Males (%)

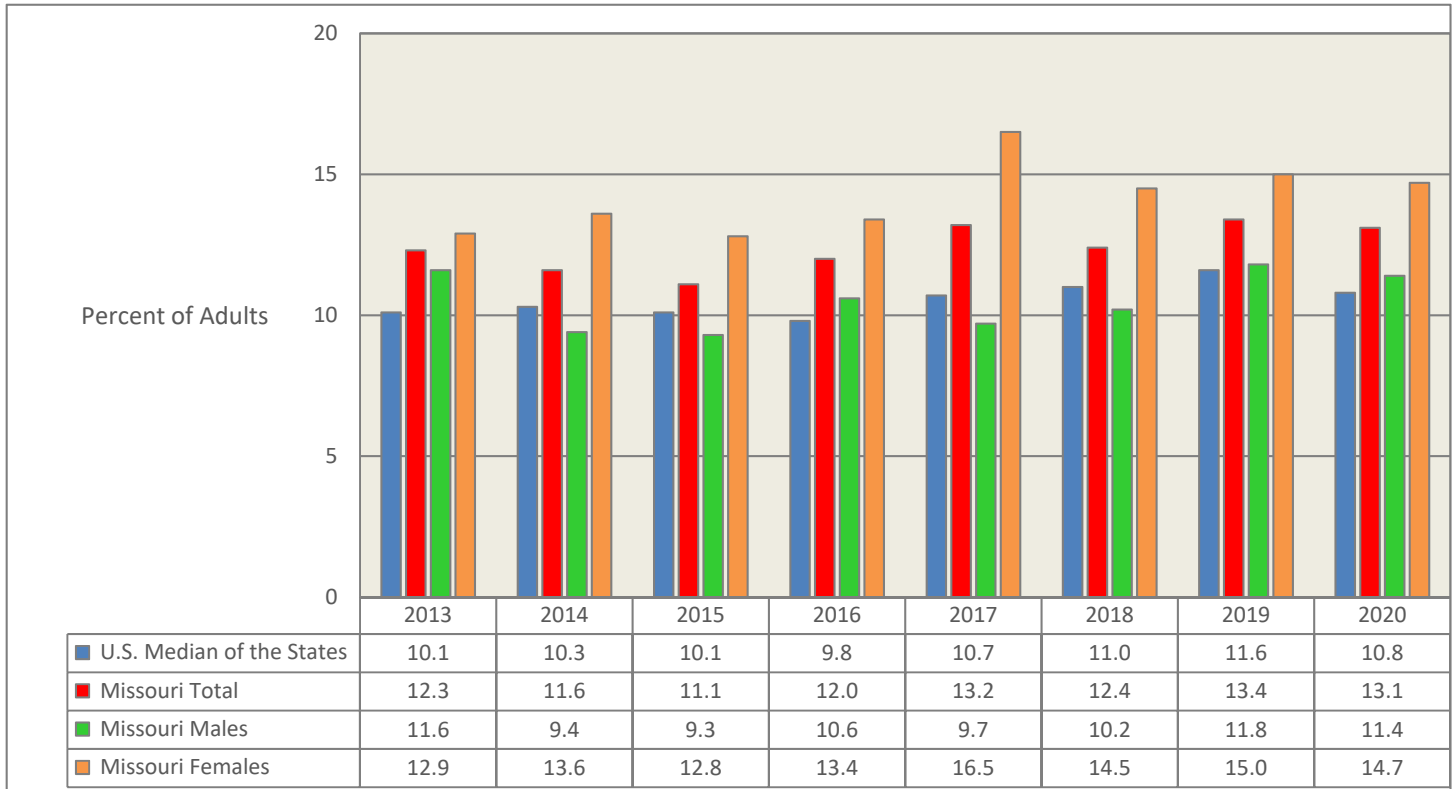

### Frequency of Current Tobacco Smoking among Missouri Adult Females (%)

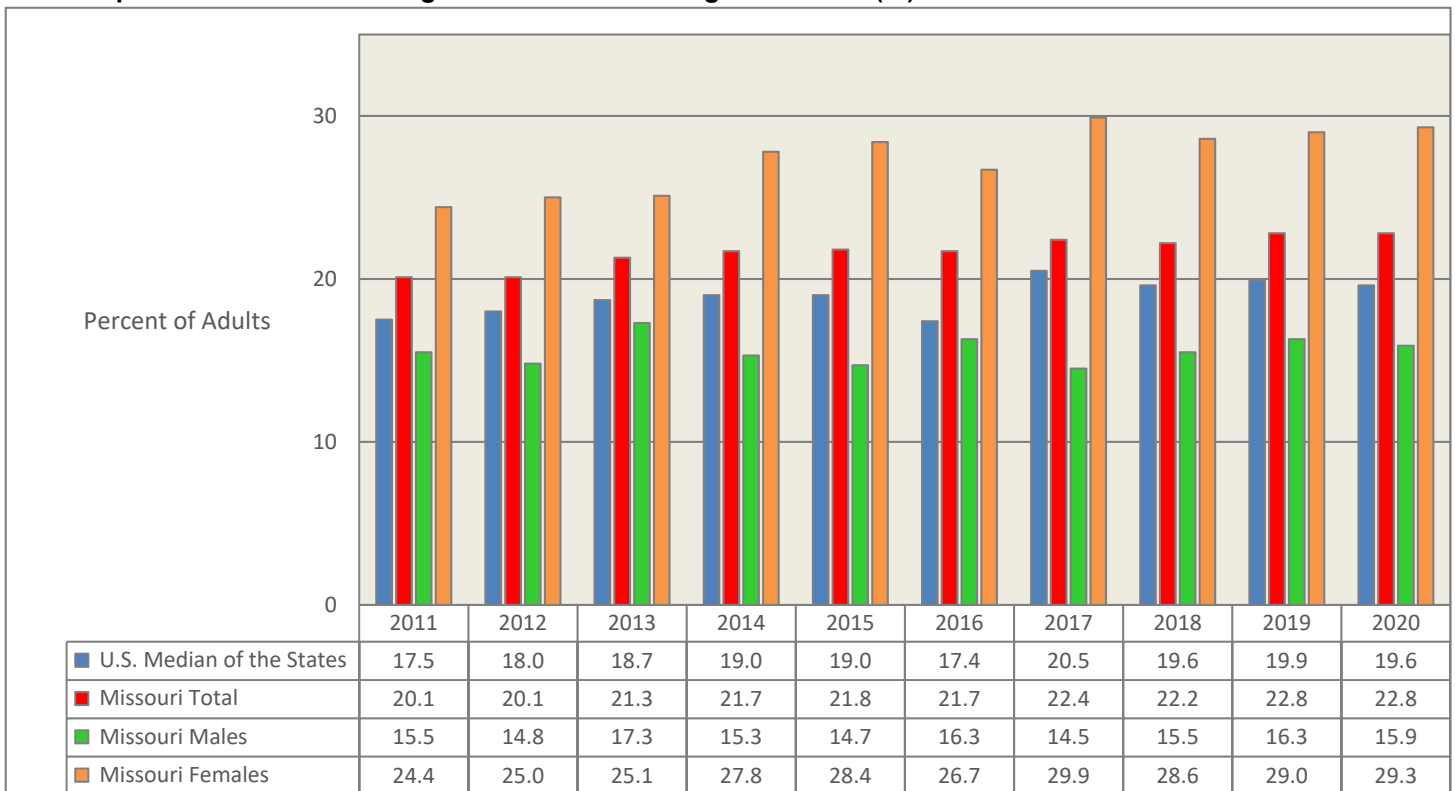

Data Source: Behavioral Risk Factor Survey, Behavioral Risk Factor Surveillance System (BRFSS), Centers for Disease Control and Prevention, National Center for Chronic Disease Prevention and Health Promotion, Division of Population Health  
Small differences in rate estimates for Missouri year-to-year and Missouri/U.S. comparisons might not be statistically significant

## BEHAVIORAL RISK FACTOR SURVEY: MENTAL HEALTH ISSUES

### Serious Difficulty Concentrating, Remembering, or Making Decisions among Adults 18 Years of Age and Older (%)

### Lifetime Depressive Disorder among Adults 18 Years of Age and Older (%)

Data Source: Behavioral Risk Factor Survey, Behavioral Risk Factor Surveillance System (BRFSS), Centers for Disease Control and Prevention, National Center for Chronic Disease Prevention and Health Promotion, Division of Population Health.  
Small differences in rate estimates for Missouri year-to-year and Missouri/U.S. comparisons might not be statistically significant.

\* Binge alcohol use in the Monitoring the Future Survey is defined as consuming 5 or more drinks on the same occasion on at least one day in the past two weeks.

‡ Survey question was re-worded and/or estimate was revised beginning with year indicated. Figures are percentage estimates.

§ Estimate is not calculated in 2020 due to small sample size for this question resulting from COVID-19 pandemic and early discontinuation of data collector

<sup>1</sup> Hospital counts for alcohol, drug, and mental disorders are based on ICD-10 diagnosis codes. Beginning with 2020 data, individuals are counted for each hospital encounter they have during the calendar year.

<sup>2</sup> In 2019 the National Incident Based Reporting System (NIPRS) replaced the Uniform Crime Reporting (UCR) system for Missouri crime and arrest reports. NIPRS data might not be fully comparable to the UCR.

<sup>3</sup> DSS Children's Division reports do not encompass all reasons for removal but document adverse conditions present. Multiple conditions and factors are often considered when a child is placed out of the home. Only the parental substance use conditions are included in this profile.

<sup>1</sup> Hospital counts for alcohol, drug, and mental disorders are based on ICD-10 diagnosis codes. Beginning with 2020 data, individuals are counted for each hospital encounter they have during the calendar year.

<sup>2</sup> In 2019 the National Incident Based Reporting System (NIPRS) replaced the Uniform Crime Reporting (UCR) system for Missouri crime and arrest reports. NIPRS data might not be fully comparable to the UCR.

<sup>3</sup> DSS Children's Division reports do not encompass all reasons for removal but document adverse conditions present. Multiple conditions and factors are often considered when a child is placed out of the home. Only the parental substance use conditions are included in this profile.

1	Hospital counts for alcohol, drug, and mental disorders are based on ICD-10 diagnosis codes. Beginning with 2020 data, individuals are counted for each hospital encounter they have during the calendar year.
2	In 2019 the National Incident Based Reporting System (NIPRS) replaced the Uniform Crime Reporting (UCR) system for Missouri crime and arrest reports. NIPRS data might not be fully comparable to the UCR.
3	DSS Children's Division reports do not encompass all reasons for removal but document adverse conditions present. Multiple conditions and factors are often considered when a child is placed out of the home. Only the parental substance use conditions are included in this profile.

1	Hospital counts for alcohol, drug, and mental disorders are based on ICD-10 diagnosis codes. Beginning with 2020 data, individuals are counted for each hospital encounter they have during the calendar year.
2	In 2019 the National Incident Based Reporting System (NIPRS) replaced the Uniform Crime Reporting (UCR) system for Missouri crime and arrest reports. NIPRS data might not be fully comparable to the UCR.
3	DSS Children's Division reports do not encompass all reasons for removal but document adverse conditions present. Multiple conditions and factors are often considered when a child is placed out of the home. Only the parental substance use conditions are included in this profile.

- Hospital counts for alcohol, drug, and mental disorders are based on ICD-10 diagnosis codes. Beginning with 2020 data, individuals are counted for each hospital encounter they have during the calendar year.
- In 2019 the National Incident Based Reporting System (NIPRS) replaced the Uniform Crime Reporting (UCR) system for Missouri crime and arrest reports. NIPRS data might not be fully comparable to the UCR.
- DSS Children's Division reports do not encompass all reasons for removal but document adverse conditions present. Multiple conditions and factors are often considered when a child is placed out of the home. Only the parental substance use conditions are included in this profile.

<sup>1</sup> Hospital counts for alcohol, drug, and mental disorders are based on ICD-10 diagnosis codes. Beginning with 2020 data, individuals are counted for each hospital encounter they have during the calendar year.

<sup>2</sup> In 2019 the National Incident Based Reporting System (NIPRS) replaced the Uniform Crime Reporting (UCR) system for Missouri crime and arrest reports. NIPRS data might not be fully comparable to the UCR.

<sup>3</sup> DSS Children's Division reports do not encompass all reasons for removal but document adverse conditions present. Multiple conditions and factors are often considered when a child is placed out of the home. Only the parental substance use conditions are included in this profile.

- Hospital counts for alcohol, drug, and mental disorders are based on ICD-10 diagnosis codes. Beginning with 2020 data, individuals are counted for each hospital encounter they have during the calendar year.
- In 2019 the National Incident Based Reporting System (NIPRS) replaced the Uniform Crime Reporting (UCR) system for Missouri crime and arrest reports. NIPRS data might not be fully comparable to the UCR.
- DSS Children's Division reports do not encompass all reasons for removal but document adverse conditions present. Multiple conditions and factors are often considered when a child is placed out of the home. Only the parental substance use conditions are included in this profile.

1	Hospital counts for alcohol, drug, and mental disorders are based on ICD-10 diagnosis codes. Beginning with 2020 data, individuals are counted for each hospital encounter they have during the calendar year.
2	In 2019 the National Incident Based Reporting System (NIPRS) replaced the Uniform Crime Reporting (UCR) system for Missouri crime and arrest reports. NIPRS data might not be fully comparable to the UCR.
3	DSS Children's Division reports do not encompass all reasons for removal but document adverse conditions present. Multiple conditions and factors are often considered when a child is placed out of the home. Only the parental substance use conditions are included in this profile.

- Hospital counts for alcohol, drug, and mental disorders are based on ICD-10 diagnosis codes. Beginning with 2020 data, individuals are counted for each hospital encounter they have during the calendar year.
- In 2019 the National Incident Based Reporting System (NIPRS) replaced the Uniform Crime Reporting (UCR) system for Missouri crime and arrest reports. NIPRS data might not be fully comparable to the UCR.
- DSS Children's Division reports do not encompass all reasons for removal but document adverse conditions present. Multiple conditions and factors are often considered when a child is placed out of the home. Only the parental substance use conditions are included in this profile.

- Hospital counts for alcohol, drug, and mental disorders are based on ICD-10 diagnosis codes. Beginning with 2020 data, individuals are counted for each hospital encounter they have during the calendar year.
- In 2019 the National Incident Based Reporting System (NIPRS) replaced the Uniform Crime Reporting (UCR) system for Missouri crime and arrest reports. NIPRS data might not be fully comparable to the UCR.
- DSS Children's Division reports do not encompass all reasons for removal but document adverse conditions present. Multiple conditions and factors are often considered when a child is placed out of the home. Only the parental substance use conditions are included in this profile.
